8025 North Point Blvd., Suite 100
Winston-Salem, NC 27106-3203

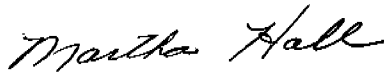

Dear Mr. Coble:

I am in receipt of the letter from Ms. Cindy Rintoul requiring prompt submittal of a Comprehensive Site Assessment (CSA). The letter points out that the submittal of the CSA is past due. The assessment has not been completed because of the complications that have arisen from the discovery of a suspected intermingled plume of chlorinated solvent contaminated groundwater that is believed to be coming from off-site. The owners of the adjacent property are currently assessing this situation.

I request an extension on the time required for the submittal for our CSA until the situation can be clarified. We will be pleased to have our consultants work with you in any way to expedite the completion of this project.

Mr. Keith Seramur, P.G., has previously represented Engineering and Environmental Services of Hickory, NC in the completion of work on this project. He has recently changed employment and now represents Geonetics Corporation of Boone, NC. Geonetics will be continuing work on this project in our behalf. Thank you for your attention and if you have any questions, please contact me.

Sincerely,

Martha Hall
